

QUESTION 19 OF 52: **NOT ANSWERED**

Data in the graph about per-pound coffee profits in Tanzania most strongly support which of the following statements?

A

Fair trade coffee consistently earned greater profits than regular coffee earned.

The data in the graph show that in Tanzania between the years 2000 and 2008, fair trade coffee profits were around \$1.30 per pound, while profits of regular coffee were in the approximate range of 20-60 cents per pound.

B

The profits earned from regular coffee did not fluctuate.

It is not supported by information in the graph.

C

Fair trade coffee profits increased between 2004 and 2006.

It is not supported by information in the graph.

D

Fair trade and regular coffee were earning equal profits by 2008.

It is not supported by information in the graph.
