

Which choice provides the best evidence for the answer to the previous question?

---

**A** lines 25–27 (“Although... formed”)

It does not provide the best evidence that internal waves are caused by similar factors but influenced by the distinct topographies of different regions. Rather, it references general information about internal waves or focus solely on those that occur in the Luzon Strait.

---

**B** lines 48–50 (“As the... it”)

It does not provide the best evidence that internal waves are caused by similar factors but influenced by the distinct topographies of different regions. Rather, it references general information about internal waves or focus solely on those that occur in the Luzon Strait.

---

**C** lines 52–55 (“As these... shelf”)

It does not provide the best evidence that internal waves are caused by similar factors but influenced by the distinct topographies of different regions. Rather, it references general information about internal waves or focus solely on those that occur in the Luzon Strait.

---

**D** lines 58–60 (“Whereas... world”)

The author provides evidence that while the researchers’ findings suggest the internal waves in the Luzon Strait are influenced by the region’s topography, the findings may “help researchers understand how internal waves are generated in other places around the world.” This statement suggests that all internal waves may be caused by some similar factors.
