

QUESTION 46 OF 52: NOT ANSWERED

Which choice provides the best evidence for the answer to the previous question?

A lines 1–2 (“Some... see”)

It does not provide the best evidence that studying internal waves will inform the development of key scientific models; rather, it provides general information about internal waves.

B lines 4–5 (“they... equipment”)

It does not provide the best evidence that studying internal waves will inform the development of key scientific models; rather, it provides general information about internal waves.

C lines 14–16 (“If... this”)

Researcher Tom Peacock provides evidence that studying internal waves will inform the development of key scientific models, such as “more accurate climate models.”

D lines 20–22 (“Internal... high”)

It does not provide the best evidence that studying internal waves will inform the development of key scientific models; rather, it provides general information about internal waves.
