

QUESTION 25 OF 52: **NOT ANSWERED**

As used in line 34, “plastic” most nearly means

A creative.

In this context “plastic” does not mean creative.

B artificial.

In this context “plastic” does not mean artificial.

C malleable.

The author states, “We know that the human brain is highly plastic; neurons and synapses change as circumstances change.” In this context, the brain is “plastic” because it is malleable, or able to change.

D sculptural.

In this context “plastic” does not mean sculptural.
