

QUESTION 27 OF 52: NOT ANSWERED

According to the author of Passage 2, what do novelists and scientists have in common?

- 
- A** They take risks when they pursue knowledge.

The author of Passage 2 does not suggest that novelists and scientists both take risks when they pursue knowledge.

- 
- B** They are eager to improve their minds.

The author of Passage 2 states that “accomplished people” don’t perform “intellectual calisthenics,” or exercises that improve their minds.

- 
- C** They are curious about other subjects.

The author of Passage 2 does not suggest that novelists and scientists both take risks when are curious about other subjects.

- 
- D** They become absorbed in their own fields.

The author of Passage 2 states that people like novelists and scientists improve in their profession by “immers[ing] themselves in their fields.” Both novelists and scientists, in other words, become absorbed in their areas of expertise.
